COSMO HANDHELD SPRAY TAN SOLUTION

Norvell Cosmo Solution is a blend of our two most popular shades: Dark and our #1 Venetian. It is designed with warm brown and cool violet undertones to give a natural tan and neutralize any redness. Only the finest ingredients are purposefully selected and paired with our innovative technology to achieve excellence in both skincare and color. The most advanced bronzers are carefully blended with the highest quality of naturally derived DHA, potent antioxidants and rich moisturizers for a radiant complexion – because healthy skin tans best!

BOLD COLOR RESULTS

Norvell is one of the largest users of DHA in the world. We test each batch to ensure quality and freshness for peak product performance. Our Cosmo Collection is expertly crafted with VIO-7, a unique blend of anti-orange bronzer pigments, designed to counter any unwanted orange undertones for the most natural-looking tan.

HOW TO USE

Depending on your equipment, dispense 2-2.5 oz. of spray solution into gun solution cup. Do not oversaturate skin. Applying too much solution will cause the tan to look unnatural. Keeping gun 6-8 inches from skin, spray in a smooth sweeping motion. Increase spray distance to 12 inches when spraying face, hands, and feet.

Unused solution may be stored in an airtight container and reused within 24 hours. Clean gun thoroughly at the end of the day and allow it to fully air dry.

Results: The tan will begin to develop within 2-4 hours after application. Avoid getting wet for at least 24 hours after application.
