HOW TO USE

Depending on your equipment, dispense 2-2.5 oz. of spray solution into gun solution cup. Do not oversaturate skin. Applying too much solution will cause the tan to look unnatural. Keeping gun 6-8 inches from skin, spray in a smooth sweeping motion. Increase spray distance to 12 inches when spraying face, hands, and feet.

Unused solution may be stored in an airtight container and reused within 24 hours. Clean gun thoroughly at the end of the day and allow it to fully air dry.

Results: The tan will begin to develop within 2-4 hours after application. Avoid getting wet for at least 24 hours after application.
