

SPRAY TAN TIPS

versaspa®
beyond tan

SPRAY TAN PREP

Arrive to your session with clean skin, if desired prep with an exfoliating mitt.

Avoid lotions prior to tanning as these could act as a barrier to prevent even application.

Wear loose fitted, dark clothing to minimize potential transfer onto clothing.

SPRAY TAN CARE

Avoid showering or getting wet, including working out, for at least 8-12 hours after your spray tan.

Be sure to keep your entire body moisturized after your tanning session to extend results.

Do not exfoliate or vigorously scrub your skin until you are ready for your next sunless session.

Scan the QR code below for more tips and recommendations on extending and caring for your sunless tan.
