

ESSENTIALS PRE-TAN EXMITT

The exfoliating **Exmitt** is a convenient, fuss-free way to gently exfoliate the skin and balance pH levels prior to a sunless tan application. The elimination of dead skin cells along with the boost of amino acid levels, allows clients to maximize color results.

1 BUFF & BALANCE

- Immediately prior to a spray tan, client's should buff & balance the skin for great results.
- Quick way for clients to prep their skin to replenish moisturize and balance pH levels to assure the most natural tan.

2 MULTIPURPOSE DESIGN

- No water required.
- Infused with amino acid boosters that magnify sunless and UV color results
- Jump start the DHA reaction
- Remove residual sunless color between sessions

3 ONE MITT FOR EVERYONE

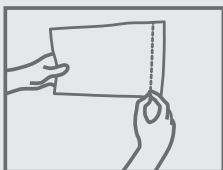

- First time tanners.
- Educated tanners who appreciate quality ingredients and expert performance.
- Gym-goers, ideal for those who can't shower before their spray session.
- Cocktail tanners.
